

# The Back Office Cooperative Medical Billing Program

If your organization provides services to clients who qualify for Medicare or Medicaid reimbursement, you may have an opportunity for upside revenue!

In response to the nonprofit community’s needs for a sustainable revenue solution for medical billing, The Back Office Cooperative (BOC) is proud to partner with Practice Management (PM) for our Medical Billing Program.

PM specializes in providing Revenue Cycle Management consulting and billing services to organizations providing medical, behavioral health, and social services. Together, we analyze your revenue cycle management operations and medical billing practices in order to maximize existing billing or - for many organizations - begin to find funding or reimbursement for services you’re already providing. Then, we implement a cost effective medical billing solution that will enable accurate, timely bill payment and an increase in revenue and cash flow, all while saving time for your staff.

PM’s consulting and billing services include assessment, evaluation and recommendations for improvement of the following processes:

### Revenue Cycle Optimization

Monitor for New Opportunities and Obstacles  
Explore and Implement Opportunities

Correct Cashflow Leakage  
Protect Existing Cashflow

### Customer Service

Client and Patient Service Representatives  
Progress Report Meetings Tailored to Your Needs  
Enhanced Reporting

### Compliance

Fully HIPAA Compliant  
Compliance Committee  
Compliance Plan

Medical billing shouldn’t have to be complicated. Set up a complimentary consultation with BOC today to see if your nonprofit could benefit from this innovative program!

**Why Partner with Practice Management?**  
Practice Management’s mission is to help community health providers succeed in mission delivery through increased revenue opportunities. Like BOC, they believe that enhanced operational resources directly benefit the community by further adding to service offerings and facility.
